Birds of Mount Kenia  
(7500 to 15500 feet.)

Specimens collected:

- 1 Red-billed Wax bill, zebra pattern
- 2 Brown bird
- 3 Red-cheated Sunbird, small.
- 4 Gray-headed brown-backed Flyc.
- 5 Cisticola, medium size
- 6 Widow-bird.
- 7 Brown Trimalia
- 8 Zosterops
- 9 Black-shouldered Kite
- 10 Corvulture.
- 11 Red-winged Plantain-eater
- 12 Rufous-tailed Flycatcher
- 13 Yellow-green Flycatcher
- 14 Cisticola, dark
- 15 Little brown Flycatcher
- 16 Rwenzori Sunbird
- 17 Stone Chat.
- 18 Bubo.
- 19 Little green-tailed Flycatcher
- 20 Violet-cheated Sunbird.
- 21 Gray-headed green bird
- 22 Gray-headed Redstart
- 23 Serinus, striped
- 24 Black Swallow.
- 25 Cisticola
- 26 Gallinago
- 27 Geocichla piaggiac.

- 28 *Merula algouensis*  
29 *Irrisor jacksoni*  
30. *Saxicola*

31. Forest Waxbill, brown.  
32. *Poicephalus nasutus*  
33. Forest Accentor  
34. Red-colored Flycatcher  
35. Black-faced Weaver.  
36. *Serinus albifrons*  
37. Pectoral Sunbird, ♀.  
38. *Trochocercus albonotatus*  
39. Tit  
40. Quail  
41. *Hirundo prestia*  
42. Brown-throated Gray.  
43. Yellow Pipit  
44. *Gymnium nuchale*  
45. *Serinus virens*  
46. Golden Sunbird  
47. *Oriolus percivali*  
48. *Dendroica*  
49. Shorttail.  
50. *Gracula*  
51. Long-crested Gray Flycatcher  
52. Anthus  
53. Horned Shorelark.  
54. Yellow-breasted Pipit  
55. *Pratincola*  
56. *Coccyz*

# Port Kampala

Dec. 21, 1909.

Black Monkey ♂ ad.  
610; 780 (pencil, 90); hind foot  
160; head, 142; height entire ear  
36; weight entire ear, 25;  
large upper lip to eye, 56  
Iris yellow-brown.

♀ ad. 510; 720 (80); h. f. 146  
head, 120; 33; 24; 46;  
mother babe

♀ ad. 515; 680 (85); h. f. 135  
head 123; 33; 24; 46.

♂ baby. 220; 320; 80.

# Camp No. 1 on the Nile

Birds seen: [up to date,

Jan. 10, 1910, no Pitta has been  
seen.]

[At Entebbe the Kavarondo Cranes  
were as tame as domestic birds]  
[Between Kampala and Butiaba  
a few francolins were flushed  
from the grass beside the  
starail; they were small and  
showed a good deal of  
ochraceous on the rump + back]

[Spurfowl were often heard  
between Kampala + Butiaba]

● [Numidia pitlorhynchos?  
abundant, in flocks, from  
Kampala to Butiaba. Several  
specimens taken.]

[Oena capensis? - One collected  
at lunch landing on the Nile above  
camp No. 1.]

[Amnecorax nigra. - Abundant  
on L. Albert.]

[Crested Spur-winged Plover -  
Abundant on L. Albert and on  
the Nile to this place.]

● Himantopus himantopus - Com-  
mon on L. Albert + to this camp

● Helodromus ochropus. - One  
seen at 1st camp west of Kampala  
beside a spring in elephant-grass

[Camp No. 2 on the Nile]

● Actitis hypoleucos. - Rather common from L. Victoria to L. Albert Nyanza; also along the Nile to this camp.

Rhyacophilus glareola. - Seen all from L. Victoria to Lake Albert.

Gallinago. - Common at this camp.

Actophilus africanus. - Common on L. Albert & the Nile.

● Oedrepanus. - Thick knees were numerous from Lake Victoria to the Nile.

Ibis aethiops. - Abundant on Lake Albert.

Hagadashia hegetach. - The large Glossy Ibis was numerous on L. Albert & the upper Nile to this camp.

Plegadis falcinellus. - Abundant from Lake Albert to this place.

Ephippiorhynchus senegalensis. - One on Lake Albert.

● Scopus umbretta. - Quite often seen from Lake Victoria to Lake Albert Nyanza.

3

● Pyrroderos persicus. -

Common on L. Victoria and L. Albert & on the Nile.

Ardea goliath. - Several on the Nile from L. Albert to this camp.

Ardea melanocephala. - Numerous on the Nile from L. Albert to this place.

Ardeopsis brachyphala. - Abundant on lakes Victoria and Albert Nyanza; also

● on the Nile to this point. Larus garzetti. L. Albert.

Bubulcus lucidus. - Very abundant & seen at Entebbe Kampala, L. Albert & on the Nile to this camp.

Phoenicoplerus. A Hummingbird was numerous on L. Albert. Sarcidiorhis melanotos. On Lake Albert.

Alopochen aegyptiacus. - Abundant on Lake Albert.

● Fuligula fuligula. - Two moorhens were the only ducks seen on L. Albert. I shot both.

● Phalacrocorax. - A

small white-bellied Cor-  
=gorant was numerous on  
Lake Victoria, L. Albert &  
on the Nile to this point.  
I also collected one on a  
small pool, when marsh  
=ing across Uganda.

● Anhinga rufa. - Several  
seen at L. Victoria. Very  
abundant on L. Albert  
& the Upper Nile.

● Pelecanus rufescens. - One  
at this camp.

● Lophogyps occipitalis. - Nu-

=merous across Uganda.  
● Necrosyrtes monachus  
Very common from Lake  
Victoria to this point.

● Eurycornis. - A few  
seen in crossing Uganda.

● Aquila wahlbergi. - Not  
uncommon in Uganda.

● Lophoceros occipitalis. - First  
seen from Kamiti to Tut. Kenia  
Abundant along railroad  
east of L. Victoria. Abun-  
=dant between lakes  
Victoria and Albert  
Nyanza.

● Helotarsus caudatus, rather  
Common across Uganda

● Haliaetus vocifer. - Numerous  
on lakes Victoria, L. Albert  
& the Nile. I shot a fine  
one but could not reach  
it on account of bluff  
bank of Nile, which I could  
not descend. No boat available.

● Milvus aegyptius. - Abund.

● Milvus kosswigi. - A few  
across Uganda & on the Nile.

● Elanus caeruleus. - Com-

=mon across Uganda.

● Circus tenuirostris. - Not  
uncommon from Nairobi  
to Butiaba.

● Falco gray. - One shot. Not  
uncommon across Uganda.

● Poeciphalus. - Com-  
mon across Uganda in  
flock of about 4 to 6.

● Eutebea to Butiaba.

● Psittacus erythacus. - Eu-  
=tebea to near Butiaba  
in heavy timber along stream.

● Glauclimn. - One seen

near

● Ceryle

Abundant Eutebea to Butiaba.

● Ceryle rudris. - Very numerous on lakes Victoria & Albert + along the Nile.

Ceryle asper. - One seen on Atter River, B.E.A. and one on the Nile a short distance above this camp.

Georchestia cyanostigma. Very abundant on lakes Victoria and Albert, along the Nile + on many small streams of Uganda in Kaffraria.

● Halcyon senegalensis. A common bird from Lake Victoria to Lake Albert.

Halcyon. - This small striped Kingfisher was common with preceding. Both occur in abundance away from water, feeding on insects.

Halcyon senegalensis. - Very numerous along the Nile to this point.

Two species of hornbills, both collected, were not uncommon where there was timber, in crossing Uganda.

● Urupa. - One hoopoe was seen in this camp.

Bee-eaters were numerous across Uganda. All of the species were collected except a large one - which I did not see - reported from Entebbe.

Leucospiza. - One seen by Mr. Cunningham in this camp.

Caprimulgus sp. - Frequently seen when we were crossing Uganda.

● Ascoris parvus. - The palm swift was numerous wherever there were palms across Uganda.

Colinus. - One species was abundant across Uganda. Specimens collected.

Two species of Touracos or Plantain-eaters were rather common across Uganda. One, larger, was collected. The other had red in wings.

# ● Centropus superciliosus

Abundant across Uganda

Indicator sp. - Occasion

= often seen & heard across Uganda

Lybionis aequatorialis. - This large & gorgeous bird was abundant from Kampala to Butiaba

A small Babbler, specimens taken, uttered a bell-like note & was frequently seen or heard across Uganda.

● Several species of Woodpecker were seen & 2 species collected in Uganda.

Harundo. - Rather large with rufous rump. Lake Victoria to this camp.

Harundo rustica. - Nairobi to this camp.

Clivicola. - Often seen from L. Victoria to L. Albert

White-headed Swallow. -

Occasional from L. Victoria to Lake Albert. Half-shot 1.

● Black Swallow. - Often seen near water from Victoria to the Nile
